//The format of parameters encoded into the embed code
swfobject.embedSWF('path to swf', 'name', 'width', 'height', '9.0.45', null, {parameters}, {});

There are two variants:

1) Image URLs are transmitted

```
{parameters} =
{name:'text',description:'text',homepage:'http://pho.to',imagesurls:['http://....flowers.jpg,http://flowers.jpg,...,http://....flowers.jpg'],
imagesthumburls:['http://....flowers_thmb.jpg,http://flowers_thmb.jpg,...,http://....flowers_thmb.jpg'],
imagescaptions:['text,,text,,text'],imagesdescriptions:['text,,text,,text'],
imageslinks:['url,,url,,url']}
```

Parameters after imagesurls may be absent.

2) The URL to the image list (playlist) is transmitted

```
{parameters} = {swurl:'http://....flowers.txt'}
```
